Standard Width Flooring

GRADING

ASH STANDARD WIDTH FLOORING

PRIME

Prime grade offers a center cut look with minimal pin knots and less heart wood content.

NATURAL

Natural grade offers some firm knots, dynamic grain and mix of heart and sap wood in each board.

ASH

Straight grain, incredible durability and long straight trunks makes White Ash a favored material to craft into impressive floorboards and planks.

Wood is perfectly imperfect! All images are meant to indicate general characteristics, but every MADERA wood floor is a unique expression of nature made from living material. All wood floors, no matter how high the grade, will have variation in grain and character. Please contact our team at sales@maderasurfaces.com with any questions or concerns.

GRADING

NORTHERN WHITE OAK STANDARD WIDTH FLOORING

PREMIUM

Premium grade showcases vertical grain with minimal pin knots and an overall linear clear looking floor with beautiful sweeping medullary rays (flecking).

PRIME

Prime grade is a clean grade with sweeping cathedral grain, minimal pin knots and sap. Prime is less dynamic than rustic and creates a clean, modern look while retaining the natural feel of center cut planks.

NATURAL

Natural grade offers a classic feel with smaller more frequent knots and wider cathedral graining. No large cracks or open knots and minimal heart oak.

LIVE

Live grade is dynamic and full of character. Striking heart oak from the tree's core, handsome knots and rift and quartered edges make this floor a dynamic expression of the mighty tree itself.

NORTHERN WHITE OAK

Quercus Alba is an extremely durable and versatile species of wood found throughout the North-East and Mid-West of the United States. Nutty brown and tight grained, this wood makes incredible plank flooring and millwork.

Wood is perfectly imperfect! All images are meant to indicate general characteristics, but every MADERA wood floor is a unique expression of nature made from living material. All wood floors, no matter how high the grade, will have variation in grain and character. Please contact our team at sales@maderasurfaces.com with any questions or concerns.

GRADING

BLACK WALNUT STANDARD WIDTH FLOORING

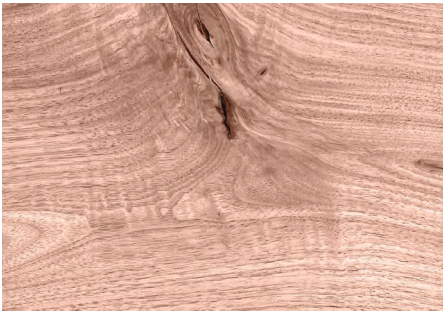

PREMIUM

Premium Black Walnut features vertical grain, clean lines and an exceptional modern elegance. No knots, cracks and even color range.

PRIME

Prime grade offers a clean center cut cathedral graining with less knots, no cracks and minimal sap wood.

NATURAL

Natural grade features dynamic grain, figure and coloring. Light brown and blonde sap wood will appear along the outer edges of the board, while heart wood towards the middle of the board is a rich chocolate brown. Natural Grade will contain filled knots and handsome cracks.

BLACK WALNUT

Known for its deep luxurious color, dynamic grain pattern and workability, black walnut is a perennial favorite for plank and pattern floorboards as well as millwork and cabinetry.

Wood is perfectly imperfect! All images are meant to indicate general characteristics, but every MADERA wood floor is a unique expression of nature made from living material. All wood floors, no matter how high the grade, will have variation in grain and character. Please contact our team at sales@maderasurfaces.com with any questions or concerns.
